A Perfect Stranger (FEMA)

(Video by FEMA)

'A Perfect Stranger' tells the story of Kinneil and Angelia and the event that brought the two women together. It is a powerful reminder that at a moment's notice, any one of us might find ourselves in a situation where we are the help until help arrives. In the end, this film calls on all Americans to remake what it means to be a bystander.

The only thing more tragic than a death from bleeding...
IS A DEATH THAT COULD HAVE BEEN PREVENTED.

The "Stop the Bleed" campaign was initiated by a federal interagency workgroup convened by the National Security Council Staff, The White House. The purpose of the campaign is to build national resilience by better preparing the public to save lives by raising awareness of basic actions to stop life threatening bleeding following everyday emergencies and man-made and natural disasters. Advances made by military medicine and research in hemorrhage control during the wars in Afghanistan and Iraq have informed the work of this initiative which exemplifies translation of knowledge back to the homeland to the benefit of the general public. The Department of the Defense owns the "Stop the Bleed" logo and phrase - trademark pending.
